

ID VITA

Telecare Smartwatch

 Intelligent Data

The best companion

ID Vita is a Smartwatch device with the latest advances and a software fully adapted to the needs of the telecare sector, hospital care or other activities — such as monitoring workers for their own safety—.

Focused on **telecare** and user care

Unique features in hospital care

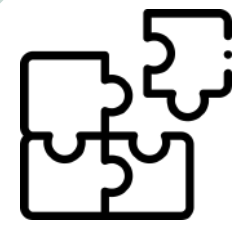

Key piece in occupational risk prevention

All on your wrist

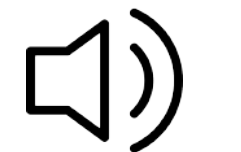

ID Vita is an accessible device and adapted to its end users. A fully customizable and modern smartwatch for your daily use.

Integrated device for daily use

Up to 48 hours of autonomy*

High quality sound for calls

Large touch screen

Robust and crash resistant design

*Depending on the use of the device

Always paying attention

Monitoring 24 hours a day

ID Vita guarantees maximum attention to the user's condition at all times. Remotely and continuously monitoring the state of health through vital signs such as heart rate or activity.

Two-way voice calls

Our smartwatch allows you to make SOS calls to the telecare center. It also allows the user to make two-way voice calls with their contacts.

Geolocation and security zones

With ID Vita the user will be located at all times. In addition, we have incorporated a warning system with security zones that can be managed remotely from the telecare center.

Automatic alerts

We have incorporated a series of automatic alerts in case of different cases such as: user fall, prolonged inactivity, low battery and others.

Care Intelligence

We integrate all the needs of users and telecare services in an accessible and synchronized environment. Connecting with all the communication protocols of the existing telecare platforms.

Leveraging **cloud capabilities** to improve the user's quality of life.

Continuous learning and adaptation through **Machine Learning** and **Artificial Intelligence**

Telecare platform
ID Vita

A cloud platform focused on monitoring the data offered by the ID Vita ecosystem and the management of telecare services associated with it.

Annex (I)

ID Vita

OS

Android customized by Intelligent Data

Touchscreen

Yes, 1.39". AMOLED.
